JOURNAL OF PERIODONTOLOGY

Subject Index to Volume 65, 1994, numbers 1 through 12 and Supplement to number 5 (May)

A

ACQUIRED IMMUNE DEFICIENCY SYNDROME/diagnosis
Necrotizing ulcerative periodontitis: A marker for immune deterioration and a predictor for the diagnosis of AIDS. Glick M, et al. 393

ACTINOBACILLUS ACTINOMYCETEMCOMITANS
Actinobacillus actinomycetemcomitans in adult periodontitis (guest editorial). Zambon JJ. 892
Actinobacillus actinomycetemcomitans in adult periodontitis. I. Topographic distribution before and after treatment. Mombelli A, et al. 820
Actinobacillus actinomycetemcomitans in adult periodontitis. II. Characterization of isolated strains and effect of mechanical periodontal treatment. Mombelli A, et al. 827
Clinical and microbiological status of osseointegrated implants. George K, et al. 766
Clinical, bacteriological, and immunological examinations and the treatment process of two Papillon-Lefèvre syndrome patients. Ishikawa I, et al. 364
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46
The distribution and transmission of *Actinobacillus actinomycetemcomitans* in families with established adult periodontitis. Preus HR, et al. 2
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
The prevalence of localized juvenile periodontitis in Saudi subjects. Nassar MM, et al. 698

ADOLESCENTS
Long-term effect of two preventive programs on the incidence of plaque and gingivitis in adolescents. Albandar JM, et al. 605

AGING
Attachment loss trends over 3 years in community-dwelling older adults. Beck JD, et al. 737
Incidence of attachment loss in commmunity-dwelling older adults. Brown LF, et al. 316
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
Periodontal disease among New England elders. Fox CH, et al. 676

AIDS See ACQUIRED IMMUNE DEFICIENCY SYNDROME

ALVEOLAR BONE LOSS/therapy
Periodontal repair in dogs: Space provision by reinforced ePTFE membranes enhances bone and cementum regeneration in large supraalveolar defects. Sigurdsson TJ, et al. 350

ALVEOLAR PROCESS/abnormalities
The prevention of localized ridge deformities using guided tissue regeneration. O'Brien TP, et al. 17

ALVEOLAR PROCESS/radiography
Evaluation of a simple modified radiographic alignment system for routine use. Carpio LC, et al. 62

ALVEOLAR RIDGE AUGMENTATION
The prevention of localized ridge deformities using guided tissue regeneration. O'Brien TP, et al. 17

AMERICAN ACADEMY OF PERIODONTOLOGY
Annual Meeting 1994 Orban Competition and Research Forum Abstracts. 976
President. 1
President's address. Newman MG. 189
President's address. Tibbetts LS. 1173
Program outline, 1994. 636

AMOXICILLIN/therapeutic use
Effects of antibiotic treatment on clinical conditions with guided tissue regeneration: One-year results. Demolon IA, et al. 713

ANTIBIOTICS/therapeutic use
Clinical, bacteriological, and immunological examinations and the treatment process of two Papillon-Lefévre syndrome patients. Ishikawa I, et al. 364
The influence of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman KS, et al. 848

ANTIBODIES
Effect of treatment on some periodontopathogens and their antibody levels in periodontal abscesses. Hafstrom CA, et al. 1022
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134

ANTIBODIES, MONOCLONAL
Assessment of interleukin-6 in the pathogenesis of periodontal disease. Takahashi K, et al. 147
Flow-cytometric identification and detection of *Porphyromonas gingivalis* by a LPS specific monoclonal antibody. Kamiya I, et al. 309

ANTIGENS, HLA
HLA A9 and B15 are associated with the generalized form, but not the localized form, of early-onset periodontal diseases. Shapira L, et al. 219
Role of cytokine in the induction of adhesion molecules on cultured human gingival fibroblasts. Takahashi K, et al. 230
Unique intronic variations of HLA-DQβ genes in early-onset periodontitis. Takashiba S, et al. 379

ANTIGENS, HLA-DR
The inhibition of interferon-α-induced upregulation of HLA-DR expression on cultured human gingival fibroblasts by interleukin-1β or tumor necrosis factor-α. Takahashi K, et al. 336
ANTIGENS, LYMPHOCYTE FUNCTION-ASSOCIATED
Role of cytokine in the induction of adhesion molecules on cultured human gingival fibroblasts. Takahashi K, et al. 230

B

BACTERIAL INFECTIONS
Cytokine-dependent synergistic regulation of interleukin-8 production from human gingival fibroblasts. Takigawa M, et al. 1002
BACTEROIDES
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
BIOCOMPATIBLE MATERIALS
Clinical evaluation of HTR polymer bone replacement grafts in human mandibular Class II molar furcations. Yukna RA. 342
Non-human primate models for testing the efficacy and safety of periodontal regeneration procedures. Caton J, et al. 1143
Periodontal guided tissue regeneration with a new resorbable polylactic acid membrane. Robert PM, et al. 414
BIOTRANSFORMATION
Technetium 99m-MDP scintigraphy of patients undergoing implant prosthetic procedures: A follow-up study. Meidan Z, et al. 330
BLOOD/analysis
Gingival overgrowth in cyclosporine A treated multiple sclerosis patients. Hefti AF, et al. 744
BLOOD VESSELS/anatomy and histology
Substance P: An immunohistochemical and biochemical study in human gingival tissues. A role for neurogenic inflammation? Bartold PM, et al. 1113
The vasculature of the periodontal ligament: A scanning electron microscopic study using corrosion casts in the rat. Selliseth, et al. 1079
BONE AND BONES
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
Use of furcal bone sounding to improve accuracy of furcation diagnosis. Mealey BL, et al. 649
BONE, DEMINERALIZED
A comparison of demineralized freeze-dried bone and autologous bone to induce bone formation in human extraction sockets. Becker W, et al. 1128
BONE DENSITY
Use of furcal bone sounding to improve accuracy of furcation diagnosis. Mealey BL, et al. 649
BONE, FREEZE-DRIED
A comparison of demineralized freeze-dried bone and autologous bone to induce bone formation in human extraction sockets. Becker W, et al. 1128
BONE LOSS
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
BONE LOSS/therapy
Clinical evaluation of HTR polymer bone replacement grafts in human mandibular Class II molar furcations. Yukna RA. 342
BONE REGENERATION
Bone grafting and guided bone regeneration for immediate dental implants in humans. Gher ME, et al. 881
A comparison of demineralized freeze-dried bone and autologous bone to induce bone formation in human extraction sockets. Becker W, et al. 1128
Freeze-dried dura mater for guided tissue regeneration in post-extraction dental implants: A clinical and histologic study. Fontana E, et al. 658
A histomorphometric study on the healing of Class III furcations utilizing bone labeling in beagle dogs. White C Jr, et al. 84
Periodontal repair in dogs: Space provision by reinforced ePTFE membranes enhances bone and cementum regeneration in large supraalveolar defects. Sigurdsson, TJ, et al. 350
BONE REMODELING
A histomorphometric study on the healing of Class III furcations utilizing bone labeling in beagle dogs. White C Jr, et al. 84
Osteoblast activity at the dental implant-bone interface: Transmission electron microscopic and high voltage electron microscopic observations. Steflik DE, et al. 404
Regional accelerated phenomenon in the mandible following mucoperiosteal flap surgery. Yaffe A, et al. 78
BONE RESORPTION
A comparison of demineralized freeze-dried bone and autologous bone to induce bone formation in human extraction sockets. Becker W, et al. 1128
A histomorphometric study on the healing of Class III furcations utilizing bone labeling in beagle dogs. White C Jr, et al. 84
Regional accelerated phenomenon in the mandible following mucoperiosteal flap surgery. Yaffe A, et al. 78

C

CALCIUM CARBONATE
Clinical evaluation of coralline calcium carbonate as a bone replacement graft material in human periodontal osseous defects. Yukna RA. 177
CAMPYLOBACTER RECTUS
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46

CAPNOCYTOPHAGA SPP.
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikstrom M, et al. 46
CD11/CD18
Molecular basis of leukocyte adhesion molecules in early-onset periodontitis patients with decreased CD11/CD18 expression on leukocytes. Katsuragi K, et al. 949
CELL ADHESION
Superficial cemental curettage: Its efficacy in promoting improved cellular attachment on human root surfaces previously damaged by periodontitis. Fukazawa E, et al. 168
CELL COMMUNICATION
Role of cytokine in the induction of adhesion molecules on cultured human gingival fibroblasts. Takahashi K, et al. 230
CELLS, CULTURED
Differential effect of TGF-1 and PDGF on proliferation of periodontal ligament cells and gingival fibroblasts. Dennison DK, et al. 641
CELLS, HeLa
The effect of a light-cured periodontal dressing material on HeLa cells and fibroblasts in vitro. Gilbert AD, et al. 324
CELLS, NON-LYMPHOID
Assessment of interleukin-6 in the pathogenesis of periodontal disease. Takahashi K, et al. 147
CEMENTUM
The effect of root conditioning with minocycline HCl in removing endotoxin from the roots of periodontally-involved teeth. Minabe M, et al. 387
Periodontal repair in dogs: Space provision by reinforced ePTFE membranes enhances bone and cementum regeneration in large supraalveolar defects. Sigurdsson TJ, et al. 350
Superficial cemental curettage: Its efficacy in promoting improved cellular attachment on human root surfaces previously damaged by periodontitis. Fukazawa E, et al. 168
CEMENTUM/anatomy and histology
Structural and functional changes of cementum surface following exposure to a modified Nd:YAG laser. Tewfik HM, et al. 297
CETYLPYRIDINIUM CHLORIDE/therapeutic use
Efficacy of mouthrinses in inhibiting the development of supragingival plaque over a 4-day period of no oral hygiene. Moran J, et al. 904
A study of a pre-brushing mouthrinse as an adjunct to oral hygiene. Hunter L, et al. 762
CHLORHEXIDINE/therapeutic use
Chlorhexidine use after two decades of over-the-counter availability. Albandar JM, et al. 109
Relationship of oral malodor to periodontitis: Evidence of independence in discrete subpopulations. Bosy A, et al. 37
CITRIC ACID/therapeutic use
Effects of tetracycline-containing gel and a mixture of tetracycline and citric acid-containing gel on non-surgical periodontal therapy. Jeong S-N, et al. 840
Subepithelial connective tissue grafts in the treatment of gingival recessions. A comparative study of 2 procedures. Bouchard P, et al. 929
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592
CLAVULANATE POTASSIUM/therapeutic use
Effects of antibiotic treatment on clinical conditions with guided tissue regeneration: One-year results. Demolon IA, et al. 713
CLINICAL TRIALS
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
Evaluation of consecutively placed unloaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 788
A study of a pre-brushing mouthrinse as an adjunct to oral hygiene. Hunter L, et al. 762
Synthetic bioresorbable barrier for regeneration in human periodontal defects. Caton J, et al. 1037
COLLAGEN
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
Topological differences in the expression of collagen Type I and collagen Type III mRNAs in the rat gingiva. Redlich M, et al. 776
COLLAGEN/microbiology
Adherence of oral microorganisms to guided tissue membranes: An in vitro study. Wang H-L, et al. 211
COLLAGEN/therapeutic use
Comparative study of collagen and expanded polytetrafluoroethylene membranes in the treatment of human Class II furcation defects. Black BS, et al. 598
Evaluation of an absorbable collagen membrane in treating Class II furcation defects. Wang H-L, et al. 1029
CONNECTIVE TISSUE
The controlled clinical evaluation of the subpedicle connective tissue graft for the coverage of gingival recession. Borghetti A, et al. 1107
Cyclosporine A upregulates interleukin-6 gene expression in human gingiva: Possible mechanism for gingival overgrowth. Williamson MS, et al. 895
Subepithelial connective tissue grafts in the treatment of gingival recessions. A comparative study of 2 procedures. Bouchard P, et al. 929
Substance P: an immunohistochemical and biochemical study in human gingival tissues. A role for neurogenic inflammation? Bartold PM, et al. 1113
CONNECTIVE TISSUE ATTACHMENT
Differential effect of TGF-β1 and PDGF on proliferation

of periodontal ligament cells and gingival fibroblasts. Dennison DK, et al. 641

CORROSION CASTING
The vasculature of the periodontal ligament: A scanning electron microscopic study using corrosion casts in the rat. Selliseth, et al. 1079

CYCLOSPORINE/adverse effects
Comparative metabolism of 3H-glucosamine by fibroblast populations exposed to cyclosporine. Zebrowski EJ, et al. 565
Cystinois and gingival hyperplasia: Demonstration of cystine crystals in gingival tissue and unusual aspects of management. Heller AN, et al. 1139
Factors related to the incidence and severity of cyclosporin-induced gingival overgrowth in transplant patients. A longitudinal study. Somacarrera ML, et al. 671
Gingival overgrowth in cyclosporine-A treated multiple sclerosis patients. Hefti AF, et al. 744
Immunohistochemical study of 30 cases of cyclosporin-A gingival overgrowth. O'Valle F, et al. 724
Localization of gingival overgrowth in heart transplant patients undergoing cyclosporin therapy. Somacarrera ML, et al. 666

CYCLOSPORINE/analysis
Gingival overgrowth in cyclosporine A treated multiple sclerosis patients. Hefti AF, et al. 744

CYCLOSPORINE A
Cyclosporine-A upregulates interleukin-6 gene expression in human gingiva: possible mechanism for gingival overgrowth. Williamson MS, et al. 895

CYSTINOSIS/therapy
Cystinois and gingival hyperplasia: Demonstration of cystine crystals in gingival tissue and unusual aspects of management. Heller AN, et al. 1139

CYSTS
Oral sebaceous retention phenomenon. Koutlas IG, et al. 186

CYTOKINES
Assessment of interleukin-6 in the pathogenesis of periodontal disease. Takahashi K, et al. 147
Cytokine-dependent synergistic regulation of interleukin-8 production from human gingival fibroblasts. Takigawa M, et al. 1002
Gingival cell IL-2 and IL-4 in early-onset periodontitis. Manhart SS, et al. 807
The inhibition of interferon-α-induced upregulation of HLA-DR expression on cultured human gingival fibroblasts by interleukin-1β or tumor necrosis factor-α. Takahashi K, et al. 336
Role of cytokine in the induction of adhesion molecules on cultured human gingival fibroblasts. Takahashi K, et al. 230

D

DECONTAMINATION
Contaminated implant surfaces: an in vitro comparison of implant surface coating and treatment modalities for decontamination. Dennison DK, et al. 942

DELIVERY OF HEALTH CARE
Utilization of dental services as a risk factor for periodontitis. Brown LJ, et al. 551

DELMOPINOL/therapeutic use
The relative efficacy of 0.1% and 0.2% delmopinol mouthrinses in inhibiting the development of supragingival dental plaque and gingivitis in man. Abbott DM, et al. 437

DENTAL ANXIETY
A mistaken health belief resulting in gingival injury: A case report. Pearlman BA. 284

DENTAL CALCULUS/adverse effects
Gingival recession: Intra-oral distribution and associated factors. Joshipura KJ, et al. 864

DENTAL CALCULUS/prevention and control
In vitro studies on laser scaling of subgingival calculus with an erbium:YAG laser. Aoki A, et al. 1097
The relationship between first presentation and subsequent observations in heavy calculus formers. Blank LW, et al. 750

DENTAL IMPLANTS
Contaminated implant surfaces: An in vitro comparison of implant surface coating and treatment modalities for decontamination. Dennison DK, et al. 942
Evaluation of consecutively placed unloaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 788
Evaluation of the effects of diagnostic radiation on titanium dental implant osseointegration in the micropig. Basquill PJ, et al. 872
Freeze-dried dura mater for guided tissue regeneration in post-extraction dental implants: A clinical and histologic study. Fontana E, et al. 658
The influence of surface-free energy on supra- and subgingival plaque microbiology. An in vitro study on implants. Quirynen M, et al. 162
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
A preliminary report on a method for studying the permeability of expanded polytetrafluoroethylene membrane to bacteria in vitro: A scanning electron microscopic and histological study. Simion M, et al. 753
Technetium 99m-MDP scintigraphy of patients undergoing implant prosthetic procedures: A follow-up study. Meidan Z, et al. 330

DENTAL IMPLANTS/microbiology
Clinical and microbiological status of osseointegrated implants. George K, et al. 766

DENTAL IMPLANTS, ENDOSSEOUS
Osteoblast activity at the dental implant-bone interface: Transmission electron microscopic and high voltage electron microscopic observations. Steflik DE, et al. 404

DENTAL IMPLANTS, IMMEDIATE
Autogenous gingival grafts as epithelial barriers for immediate implants: Case reports. Evian CI, et al. 201
Bone grafting and guided bone regeneration for immediate dental implants in humans. Gher ME, et al. 881

DENTAL INSTRUMENTS
A clinical study of an electronic constant force periodontal probe. Tupta-Veselicky L, et al. 616
Comparison of a conventional probe with electronic and manual pressure-regulated probes. Perry DA, et al. 908
Probing velocity: Novel approach for assessment of inflamed periodontal attachment. Tessier J-F, et al. 103
DENTAL PLAQUE/adverse effects
Oral hygiene and compliance as risk factors in periodontitis. Bakdash B. 539
Response of regenerative tissues to plaque: A histological study in monkeys. Ling L-J, et al. 779
DENTAL PLAQUE/microbiology
Comparison of DNA probe and ELISA microbial analysis methods and their association with adult periodontitis. Melvon WL, et al. 576
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46
Direct detection of *Porphyromonas gingivalis* in *Macaca fascicularis* dental plaque samples using an oligonucleotide probe. Moncla BJ, et al. 398
The influence of surface-free energy on supra- and subgingival plaque microbiology. An in vitro study on implants. Quirynen M, et al. 162
DENTAL PLAQUE/prevention and control
Chlorhexidine use after two decades of over-the-counter availability. Albandar JM, et al. 109
Clinical evaluation of the efficacy and safety of a new sonic toothbrush. Johnson BD, et al. 692
Efficacy of mouthrinses in inhibiting the development of supragingival plaque over a 4-day period of no oral hygiene. Moran J, et al. 904
The influencee of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman KS, et al. 848
Long-term effect of two preventive programs on the incidence of plaque and gingivitis in adolescents. Albandar JM, et al. 605
Mechanism of irrigation effects on gingivitis. Chaves ES, et al. 1016
The relative efficacy of 0.1% and 0.2% delmopinol mouthrinses in inhibiting the development of supragingival dental plaque and gingivitis in man. Abbott DM, et al. 437
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30
A 12-month study of the efficacy of a pre-brushing rinse in plaque removal. O'Mullane DM, et al. 611
DENTAL PLAQUE INDEX
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
DENTAL PROPHYLAXIS
The relationship between first presentation and subsequent observations in heavy calculus formers. Blank LW, et al. 750
DENTAL PROSTHESIS DESIGN
Evaluation of consecutively placed unloaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 788
DENTAL PULP DISEASES/etiology
Intrapulpal temperatures during pulsed Nd:YAD laser treatment of dentin, in vitro. White JM, et al. 255
DENTAL PULP DISEASES/microbiology
Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
DENTAL PULP DISEASES/pathogenesis
Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
DENTIFRICES
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
DENTIFRICES/adverse effects
Dentin hypersensitivity. Occlusion of dentinal tubules by brushing with and without an abrasive dentifrice. Kuroiwa M, et al. 291
DENTIN
Intrapulpal temperatures during pulsed Nd:YAD laser treatment of dentin, in vitro. White JM, et al. 255
DENTIN HYPERSENSITIVITY/etiology
Dentin hypersensitivity. Occlusion of dentinal tubules by brushing with and without an abrasive dentifrice. Kuroiwa M, et al. 291
DENTIN HYPERSENSITIVITY/prevention and control
Dentin hypersensitivity. Occlusion of dentinal tubules by brushing with and without an abrasive dentifrice. Kuroiwa M, et al. 291
DENTIN HYPERSENSITIVITY/therapy
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
DERMATITIS
Factitious gingival ulceration: A presenting sign of Munchausen's syndrome? Heasman PA, et al. 442
DIABETES MELLITUS/complications
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260
DIABETES MELLITUS/prevention and control
Diabetes - a risk factor for periodontitis in adults? Oliver RC, et al. 530
DIABETES MELLITUS, NON-INSULIN DEPENDENT
Periodontal disease in non-insulin dependent diabetes mellitus (NIDDM). The effect of age and time since diagnosis. Cerda-G J, et al. 991
DIABETES MELLITUS, NON-INSULIN DEPENDENT/complications
Association of the severity of periodontal disease with organ complications in Type I diabetic patients. Karjalainen KM, et al. 1067
DIABETIC RETINOPATHY
Association of the severity of periodontal disease with

organ complications in Type I diabetic patients. Karjalainen KM, et al. 1067

DIAGNOSIS, COMPUTER-ASSISTED
A clinical study of an electronic constant force periodontal probe. Tupta-Veselicky L, et al. 616
Evaluation of a simple modified radiographic alignment system for routine use. Carpio LC, et al. 62

DNA
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
Topological differences in the expression of collagen Type I and collagen Type III mRNAs in the rat gingiva. Redlich M, et al. 776

DNA PROBE
Comparison of DNA probe and ELISA microbial analysis methods and their association with adult periodontitis. Melvon WL, et al. 576
Microbial associations of 4 putative periodontal pathogens in Sudanese adult periodontitis patients determined by DNA probe analysis. Ali RW, et al. 1053

E

EDITORIAL
Actinobacillus actinomycetemcomitans in adult periodontitis. Zambon JJ. 892

EIKENELLA CORRODENS
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikstrom M, et al. 46

ELASTASE
Elastase and α-1-proteinase inhibitor in gingival crevicular fluid and gingival tissue in adult and juvenile periodontitis. Ingman T, et al. 702
Longitudinal evaluation of elastase as a marker for the progression of periodontitis. Armitage GC, et al. 120

ENDOTOXIN
The effect of root conditioning with minocycline HCl in removing endotoxin from the roots of periodontally-involved teeth. Minabe M, et al. 387

ENVIRONMENT
Genetic and heritable risk factors in periodontal disease. Michalowicz BS. 479

ENZYME-LINKED IMMUNOSORBENT ASSAY
Comparison of DNA probe and ELISA microbial analysis methods and their association with adult periodontitis. Melvon WL, et al. 576
Interleukin-1β concentration of gingival crevicular fluid. Preiss D, et al. 423

EPITHELIAL BARRIERS
Autogenous gingival grafts as epithelial barriers for immediate implants: Case reports. Evian CI, et al. 201

EPITHELIUM
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134

ESTHETICS, DENTAL
Subepithelial connective tissue grafts in the treatment of gingival recessions. A comparative study of 2 procedures. Bouchard P, et al. 929

ETHNIC GROUPS
HLA A9 and B15 are associated with the generalized form, but not the localized form, of early-onset periodontal diseases. Shapira L, et al. 219
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential preedictors. Aass AA, et al. 814

F

FACTITIOUS DISORDERS
Factitious gingival ulceration: A presenting sign of Munchausen's syndrome? Heasman PA, et al. 442
A mistaken health belief resulting in gingival injury: A case report. Pearlman BA. 284

FIBRIN/therapeutic use
Combined guided tissue regeneration, root conditioning, and fibrin-fibronectin system application in the treatment of gingival recession. A 15-case report. Trombelli L, et al. 796

FIBROBLASTS
Alterations of fibroblast metabolism in early ligature-induced periodontitis in the Cynomolgus monkey. Hussain MZ, et al. 771
Comparative metabolism of 3H-glucosamine by fibroblast populations exposed to cyclosporine. Zebrowski EJ, et al. 565
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
Cytokine-dependent synergistic regulation of interleukin-8 production from human gingival fibroblasts. Takigawa M, et al. 1002
Differential effect of TGF-β1 and PDGF on proliferation of periodontal ligament cells and gingival fibroblasts. Dennison DK, et al. 641
The effect of a light-cured periodontal dressing material on HeLa cells and fibroblasts in vitro. Gilbert AD, et al. 324
The effect of platelet-derived growth factor on the cellular response of the periodontium: An autoradiographic study on dogs. Wang H-L, et al. 429
The inhibition of interferon-γ-induced upregulation of HLA-DR expression on cultured human gingival fibroblasts by interleukin-1β or tumor necrosis factor-α. Takahashi K, et al. 336
Prostaglandin E_2 inhibits interleukin-6 release but not its transcription in human gingival fibroblasts stimulated with interleukin-1β or tumor necrosis factor-α. Takigawa M, et al. 1122
Role of cytokine in the induction of adhesion molecules on cultured human gingival fibroblasts. Takahashi K, et al. 230
Structural and functional changes of cementum surface

following exposure to a modified Nd:YAG laser. Tewfik HM, et al. 297
Substance P: An immunohistochemical and biochemical study in human gingival tissues. A role for neurogenic inflammation? Bartold PM, et al. 1113
FIBRONECTIN/therapeutic use
Combined guided tissue regeneration, root conditioning, and fibrin-fibronectin system application in the treatment of gingival recession. A 15-case report. Trombelli L, et al. 796
FLOW CYTOMETRY
Flow-cytometric identification and detection of *Porphyromonas gingivalis* by a LPS specific monoclonal antibody. Kamiya I, et al. 309
The inhibition of interferon-α-induced upregulation of HLA-DR expression on cultured human gingival fibroblasts by interleukin-1β or tumor necrosis factor-α. Takahashi K, et al. 336
FLUORIDES, TOPICAL
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
FOLLOW-UP STUDIES
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Factors related to the incidence and severity of cyclosporin-induced gingival overgrowth in transplant patients. A longitudinal study. Somacarrera ML, et al. 671
Freeze-dried dura mater for guided tissue regeneration in post-extraction dental implants: A clinical and histologic study. Fontana E, et al. 658
The influence of molar furcation involvement and mobility on future clinical periodontal attachment loss. Wang H-L, et al. 25
Long-term effect of two preventive programs on the incidence of plaque and gingivitis in adolescents. Albandar JM, et al. 605
Maintenance therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 274
Methods of assessing risk for periodontitis and developing multifactorial models. Beck JD. 468
Oral hygiene and compliance as risk factors in periodontitis. Bakdash B. 539
Periodontal disease in non-insulin dependent diabetes mellitus (NIDDM). The effect of age and time since diagnosis. Cerda-G J, et al. 991
FORECASTING
Periodontal disease as we approach the year 2000. Löe H. 464
FURCATION
The influence of molar furcation involvement and mobility on future clinical periodontal attachment loss. Wang H-L, et al. 25
FURCATION/diagnosis
Use of furcal bone sounding to improve accuracy of furcation diagnosis. Mealey BL, et al. 649
FURCATION/drug therapy
Effects of antibiotic treatment on clinical conditions with guided tissue regeneration: one-year results. Demolon IA, et al. 713
FURCATION/microbiology
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
FURCATION/surgery
Clinical use of a bioresorbable matrix barrier in guided tissue regeneration therapy. Case series. Laurell L, et al. 967
Clinical evaluation of HTR polymer bone replacement grafts in human mandibular Class II molar furcations. Yukna RA. 342
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
FURCATION/therapy
Clinical evaluation of HTR polymer bone replacement grafts in human mandibular Class II molar furcations. Yukna RA. 342
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Comparative study of collagen and expanded polytetrafluoroethylene membranes in the treatment of human Class II furcation defects. Black BS, et al. 598
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
Evaluation of an absorbable collagen membrane in treating Class II furcation defects. Wang H-L, et al. 1029
A histomorphometric study on the healing of Class III furcations utilizing bone labelling in Beagle dogs. White C Jr, et al. 84
Synthetic bioresorbable barrier for regeneration in human periodontal defects. Caton J, et al. 1037
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592
FUSOBACTERIUM NUCLEATUM
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46

G

GENE EXPRESSION
Cyclosporine A upregulates interleukin-6 gene expression in human gingiva: possible mechanism for gingival overgrowth. Williamson MS, et al. 895
GENES, HLA
Unique intronic variations of HLA-DQβ genes in early-onset periodontitis. Takashiba S, et al. 379
GENES, MHC
Unique intronic variations of HLA-DQβ genes in early-onset periodontitis. Takashiba S, et al. 379
GENETICS, MEDICAL
Genetic and heritable risk factors in periodontal disease. Michalowicz BS. 479

GIANT CELL TUMORS
Identification and semi-quantification of estrogen and progesterone receptors in peripheral giant cell lesions of the jaws. Whitaker SB, et al. 280
GINGIVA/anatomy and histology
Substance P: an immunohistochemical and biochemical study in human gingival tissues. A role for neurogenic inflammation? Bartold PM, et al. 1113
Topological differences in the expression of collagen Type I and collagen Type III mRNAs in the rat gingiva. Redlich M, et al. 776
The vasculature of the periodontal ligament: A scanning electron microscopic study using corrosion casts in the rat. Selliseth NJ, et al. 1079
GINGIVAL ATTACHMENT
Attachment loss trends over 3 years in community-dwelling older adults. Beck JD, et al. 737
Incidence of attachment loss in commmunity-dwelling older adults. Brown LF, et al. 316
Probing velocity: Novel approach for assessment of inflamed periodontal attachment. Tessier J-F, et al. 103
Superficial cemental curettage: Its efficacy in promoting improved cellular attachment on human root surfaces previously damaged by periodontitis. Fukazawa E, et al. 168
GINGIVAL CREVICULAR FLUID
Development of a risk profile for periodontal disease: Microbial and host response factors. Lamster IB, et al. 511
Longitudinal evaluation of elastase as a marker for the progression of periodontitis. Armitage GC, et al. 120
GINGIVAL CREVICULAR FLUID/analysis
Elastase and α-1-proteinase inhibitor in gingival crevicular fluid and gingival tissue in adult and juvenile periodontitis. Ingman T, et al. 702
Interleukin-1β concentration of gingical crevicular fluid. Preiss D, et al. 423
GINGIVAL HYPERPLASIA/etiology
Comparative metabolism of 3H-glucosamine by fibroblast populations exposed to cyclosporine. Zebrowski EJ, et al. 565
Cyclosporine-A upregulates interleukin-6 gene expression in human gingiva: Possible mechanism for gingival overgrowth. Williamson MS, et al. 895
Cystinosis and gingival hyperplasia: Demonstration of cystine crystals in gingival tissue and unusual aspects of management. Heller AN, et al. 1139
Factors related to the incidence and severity of cyclosporine-induced gingival overgrowth in transplant patients. A longitudinal study. Somacarrera ML, et al. 671
Gingival overgrowth in cyclosporine-A treated multiple sclerosis patients. Hefti AF, et al. 744
Immunohistochemical study of 30 cases of cyclosporin-A gingival overgrowth. O'Valle F, et al. 724
Localization of gingival overgrowth in heart transplant patients undergoing cyclosporine therapy. Somacarrera ML, et al. 666
GINGIVAL INDEX
Microbiota of rapidly progressive periodontitis lesions in association with clinical parameters. Kamma JJ, et al. 1073
GINGIVAL RECESSION/epidemiology
Attachment loss trends over 3 years in community-dwelling older adults. Beck JD, et al. 737
GINGIVAL RECESSION/etiology
Gingival recession: Intra-oral distribution and associated factors. Joshipura KJ, et al. 864
GINGIVAL RECESSION/microbiology
Incidence of attachment loss In commmunity-dwelling older adults. Brown LF, et al. 316
GINGIVAL RECESSION/surgery
The controlled clinical evaluation of the subpedicle connective tissue graft for the coverage of gingival recession. Borghetti A, et al. 1107
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
Subepithelial connective tissue grafts in the treatment of gingival recessions. A comparative study of 2 procedures. Bouchard P, et al. 929
GINGIVAL RECESSION/therapy
Combined guided tissue regeneration, root conditioning, and fibrin-fibronectin system application in the treatment of gingival recession. A 15-case report. Trombelli L, et al. 796
GINGIVITIS/diagnosis
The diagnosis of periodontal conditions associated with HIV infection. Robinson PG, et al. 236
Subgingival temperature in rats with natural gingivitis. Isogai E, et al. 710
GINGIVITIS/immunology
Elastase and α-1-proteinase inhibitor in gingival crevicular fluid and gingival tissue in adult and juvenile periodontitis. Ingman T, et al. 702
GINGIVITIS/microbiology
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30
GINGIVITIS/prevention and control
Alterations of fibroblast metabolism in early ligature-induced periodontitis in the Cynomolgus monkey. Hussain MZ, et al. 771
Clinical evaluation of the efficacy and safety of a new sonic toothbrush. Johnson BD, et al. 692
Long-term effect of two preventive programs on the incidence of plaque and gingivitis in adolescents. Albandar JM, et al. 605
Mechanism of irrigation effects on gingivitis. Chaves ES, et al. 1016
The relative efficacy of 0.1% and 0.2% delmopinol mouthrinses in inhibiting the development of supragingival dental plaque and gingivitis in man. Abbott DM, et al. 437
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30
A 12-month study of the efficacy of a pre-brushing rinse in plaque removal. O'Mullane DM, et al. 611
GINGIVITIS, NECROTIZING ULCERATIVE
Impaired bactericidal activity of PMN from two brothers with necrotizing ulcerative gingivo-periodontitis. Cutler CW, et al. 357

GLUCOSAMINE
Comparative metabolism of 3H-glucosamine by fibroblast populations exposed to cyclosporine. Zebrowski EJ, et al. 565
GLUCURONIDASE
Development of a risk profile for periodontal disease: Microbial and host response factors. Lamster IB, et al. 511
GRAFTS/surgery
The connective tissue with partial thickness double pedicle graft: The results of 100 consecutively-treated defects. Harris RJ. 448
Short-term healing of autogenous and allogeneic bone grafts after sinus augmentation: A report of 2 cases. Nishibori M, et al. 958
GRAFTS, BONE
Clinical evaluation of coralline calcium carbonate as a bone replacement graft material in human periodontal osseous defects. Yukna RA. 177
Clinical evaluation of HTR polymer bone replacement grafts in human mandibular Class II molar furcations. Yukna RA. 342
A comparison of demineralized freeze-dried bone and autologous bone to induce bone formation in human extraction sockets. Becker W, et al. 1128
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
Short-term healing of autogenous and allogeneic bone grafts after sinus augmentation: A report of 2 cases. Nishibori M, et al. 958
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592
GRAFTS, GINGIVA
Autogenous gingival grafts as epithelial barriers for immediate implants: Case reports. Evian CI, et al. 201
GRAFTS, PEDICLE
The connective tissue with partial thickness double pedicle graft: The results of 100 consecutively-treated defects. Harris RJ. 448
The controlled clinical evaluation of the subpedicle connective tissue graft for the coverage of gingival recession. Borghetti A, et al. 1107
GRANULOMA, GIANT CELL
Identification and semi-quantification of estrogen and progesterone receptors in peripheral giant cell lesions of the jaws. Whitaker SB, et al. 280
GROWTH FACTOR
Comparison of canine and non-human primate animal models for periodontal regenerative therapy: results following a single administration of PDGF/IGF-I. Giannobile WV, et al. 1158
Differential effect of TGF-β1 and PDGF on proliferation of periodontal ligament cells and gingival fibroblasts. Dennison DK, et al. 641
GROWTH FACTOR, EPIDERMAL
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
GROWTH FACTOR, FIBROBLAST
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
GROWTH FACTOR, PLATELET-DERIVED
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
The effect of platelet-derived growth factor on the cellular response of the periodontium: An autoradiographic study on dogs. Wang H-L, et al. 429
GUIDED TISSUE REGENERATION
Adherence of oral microorganisms to guided tissue membranes: An in vitro study. Wang H-L, et al. 211
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Clinical use of a bioresorbable matrix barrier in guided tissue regeneration therapy. Case series. Laurell L, et al. 967
Combined guided tissue regeneration, root conditioning, and fibrin-fibronectin system application in the treatment of gingival recession. A 15-case report. Trombelli L, et al. 796
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Clinical findings. Sander L, et al. 914
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Microbiological findings. Frandsen EVG, et al. 921
Evaluation of an absorbable collagen membrane in treating Class II furcation defects. Wang H-L, et al. 1029
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
Freeze-dried dura mater for guided tissue regeneration in post-extraction dental implants: A clinical and histologic study. Fontana E, et al. 658
Guided tissue regeneration: Comparison of bioabsorbable and non-bioabsorbable membranes. Histologic and histometric study in dogs. Caffesse RG, et al. 583
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
A histomorphometric study on the healing of Class III furcations utilizing bone labeling in beagle dogs. White C Jr, et al. 84
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134
Locally delivered minocycline and guided tissue regeneration to treat post-juvenile periodontitis. A case report. Saito A, et al. 835

Periodontal guided tissue regeneration with a new resorbable polylactic acid membrane. Robert PM, et al. 414
A preliminary report on a method for studying the permeability of expanded polytetrafluoroethylene membrane to bacteria in vitro: A scanning electron microscopic and histological study. Simion M, et al. 753
The prevention of localized ridge deformities using guided tissue regeneration. O'Brien TP, et al. 17
Response of regenerative tissues to plaque: A histological study in monkeys. Ling L-J, et al. 779
Synthetic bioresorbable barrier for regeneration in human periodontal defects. Caton J, et al. 1037

H

HALITOSIS/etiology
Relationship of oral malodor to periodontitis: Evidence of independence in discrete subpopulations. Bosy A, et al. 37
HEALTH BEHAVIOR
A mistaken health belief resulting in gingival injury: A case report. Pearlman BA. 284
HEART TRANSPLANTATION
Factors related to the incidence and severity of cyclosporine-induced gingival overgrowth in transplant patients. A longitudinal study. Somacarrera ML, et al. 671
Localization of gingival overgrowth in heart transplant patients undergoing cyclosporine therapy. Somacarrera ML, et al. 666
HEAT/adverse effects
Intrapulpal temperatures during pulsed Nd:YAD laser treatment of dentin, in vitro. White JM, et al. 255
HIV INFECTION/complications
The diagnosis of periodontal conditions associated with HIV infection. Robinson PG, et al. 236
HIV INFECTION/diagnosis
The diagnosis of periodontal conditions associated with HIV infection. Robinson PG, et al. 236
Necrotizing ulcerative periodontitis: A marker for immune deterioration and a predictor for the diagnosis of AIDS. Glick M, et al. 393
HOST FACTORS
Sequential manifestation of different forms of early-onset periodontitis. A case report. Shapira L, et al. 631
HOST RESPONSE
Development of a risk profile for periodontal disease: Microbial and host response factors. Lamster IB, et al. 511
HYPERPLASIA
Oral sebaceous retention phenomenon. Koutlas IG, et al. 186
HYDROXYAPATITE
Bone grafting and guided bone regeneration for immediate dental implants in humans. Gher ME, et al. 881
Contaminated implant surfaces: An in vitro comparison of implant surface coating and treatment modalities for decontamination. Dennison DK, et al. 942
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008

I

IN MEMORIAM 1095
INFLAMMATION
Host responses in patients with generalized refractory periodontitis. Hernichel-Gorbach E, et al. 8
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
Subgingival temperature in rats with natural gingivitis. Isogai E, et al. 710
INFLAMMATION/etiology
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
Substance P: An immunohistochemical and biochemical study in human gingival tissues. A role for neurogenic inflammation? Bartold PM, et al. 1113
INFLAMMATION/therapy
Probing velocity: Novel approach for assessment of inflamed periodontal attachment. Tessier J-F, et al. 103
INTERLEUKIN-1
Host responses in patients with generalized refractory periodontitis. Hernichel-Gorbach E, et al. 8
Interleukin-1β concentration of gingical crevicular fluid. Preiss D, et al. 423
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
INTERLEUKIN-1
Smokeless tobacco effects on monocyte secretion of PGE_2 and IL-1β. Payne JB, et al. 937
INTERLEUKIN-4
Gingival cell IL-2 and IL-4 in early-onset periodontitis. Manhart SS, et al. 807
INTERLEUKIN-6
Assessment of interleukin-6 in the pathogenesis of periodontal disease. Takahashi K, et al. 147
Cyclosporine-A upregulates interleukin-6 gene expression in human gingiva: Possible mechanism for gingival overgrowth. Williamson MS, et al. 895
Prostaglandin E_2 inhibits interleukin-6 release but not its transcription in human gingival fibroblasts stimulated with interleukin-1β or tumor necrosis factor-α. Takigawa M, et al. 1122
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
INTERLEUKIN-8
Cytokine-dependent synergistic regulation of interleukin-8 production from human gingival fibroblasts. Takigawa M, et al. 1002
IRRIGATION
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568

In vitro studies on laser scaling of subgingival calculus with an erbium:YAG laser. Aoki A, et al. 1097

J

JOURNAL OF PERIODONTOLOGY
Ad hoc reviewers. 97
Instructions to authors. 98

K

KERATIN
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134
KIDNEY TRANSPLANTATION
Factors related to the incidence and severity of cyclosporine-induced gingival overgrowth in transplant patients. A longitudinal study. Somacarrera ML, et al. 671

L

LASER THERAPY
Intrapulpal temperatures during pulsed Nd:YAD laser treatment of dentin, in vitro. White JM, et al. 255
LASERS
In vitro studies on laser scaling of subgingival calculus with an erbium:YAG laser. Aoki A, et al. 1097
Intrapulpal temperatures during pulsed Nd:YAD laser treatment of dentin, in vitro. White JM, et al. 255
Structural and functional changes of cementum surface following exposure to a modified Nd:YAG laser. Tewfik HM, et al. 297
LETTERS TO THE EDITOR, 287, 731, 804
LEUKOCYTES
Immunohistochemical study of 30 cases of cyclosporine-A gingival overgrowth. O'Valle F, et al. 724
LIGATION/adverse effects
Alterations of fibroblast metabolism in early ligature-induced periodontitis in the Cynomolgus monkey. Hussain MZ, et al. 771
LIPOPOLYSACCHARIDES
Flow-cytometric identification and detection of *Porphyromonas gingivalis* by a LPS specific monoclonal antibody. Kamiya I, et al. 309
Host responses in patients with generalized refractory periodontitis. Hernichel-Gorbach E, et al. 8
Priming effect of *Porphyromonas gingivalis* lipopolysaccharide on superoxide production by neutrophils from healthy and rapidly progressive periodontitis subjects. Shapira L, et al. 129
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
Smokeless tobacco effects on monocyte secretion of PGE_2 and IL-1β. Payne JB, et al. 937
LIVER TRANSPLANTATION
Factors related to the incidence and severity of cyclosporine-induced gingival overgrowth in transplant patients. A longitudinal study. Somacarrera ML, et al. 671
LYMPHOCYTES, B CELL
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
LYMPHOCYTES, T CELL
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008

M

MACACA FASCICULARIS
Direct detection of *Porphyromonas gingivalis* in *Macaca fascicularis* dental plaque samples using an oligonucleotide probe. Moncla BJ, et al. 398
MACROPHAGES
Phenotypic characterization of mononuclear cells following anorganic bovine bone implantation in rats. Cohen RE, et al. 1008
MAGNETIC RESONANCE IMAGING
The effect of a light-cured periodontal dressing material on HeLa cells and fibroblasts in vitro. Gilbert AD, et al. 324
MAXILLA/anatomy and histology
Osteosarcoma presenting as supracrestal bone formation. Kabani SP, et al. 92
MAXILLA/radiography
Osteosarcoma presenting as supracrestal bone formation. Kabani SP, et al. 92
MAXILLARY SINUS
Short-term healing of autogenous and allogeneic bone grafts after sinus augmentation: A report of 2 cases. Nishibori M, et al. 958
MEMBRANES, ARTIFICIAL
Adherence of oral microorganisms to guided tissue membranes: An in vitro study. Wang H-L, et al. 211
Clinical use of a bioresorbable matrix barrier in guided tissue regeneration therapy. Case series. Laurell L, et al. 967
Comparative study of collagen and expanded polytetrafluoroethylene membranes in the treatment of human Class II furcation defects. Black BS, et al. 598
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Clinical findings. Sander L, et al. 914
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Microbiological findings. Frandsen EVG, et al. 921
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
Freeze-dried dura mater for guided tissue regeneration in post-extraction dental implants: A clinical and histologic study. Fontana E, et al. 658
Guided tissue regeneration: Comparison of bioabsorbable

and non-bioabsorbable membranes. Histologic and histometric study in dogs. Caffesse RG, et al. 583
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
Periodontal guided tissue regeneration with a new resorbable polylactic acid membrane. Robert PM, et al. 414
Periodontal repair in dogs: Space provision by reinforced ePTFE membranes enhances bone and cementum regeneration in large supraalveolar defects. Sigurdsson TJ, et al. 350
Synthetic bioresorbable barrier for regeneration in human periodontal defects. Caton J, et al. 1037
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592

MEMBRANES, ARTIFICIAL/microbiology
A preliminary report on a method for studying the permeability of expanded polytetrafluoroethylene membrane to bacteria in vitro: A scanning electron microscopic and histological study. Simion M, et al. 753

MEMBRANES, BARRIER
Adherence of oral microorganisms to guided tissue membranes: An in vitro study. Wang H-L, et al. 211
Clinical, microbiological, and histological factors with influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Clinical use of a bioresorbable matrix barrier in guided tissue regeneration therapy. Case series. Laurell L, et al. 967
Comparative study of collagen and expanded polytetrafluoroethylene membranes in the treatment of human Class II furcation defects. Black BS, et al. 598
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Clinical findings. Sander L, et al. 914
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Microbiological findings. Frandsen EVG, et al. 921
The effect of platelet-derived growth factor on the cellular response of the periodontium: An autoradiographic study on dogs. Wang H-L, et al. 429
Evaluation of an absorbable collagen membrane in treating Class II furcation defects. Wang H-L, et al. 1029
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
Guided tissue regeneration: Comparison of bioabsorbable and non-bioabsorbable membranes. Histologic and histometric study in dogs. Caffesse RG, et al. 583
A histomorphometric study on the healing of Class III furcations utilizing bone labeling in beagle dogs. White C Jr, et al. 84
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134
Synthetic bioresorbable barrier for regeneration in human periodontal defects. Caton J, et al. 1037
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592

MEMBRANES, BARRIER/microbiology
A preliminary report on a method for studying the permeability of expanded polytetrafluoroethylene membrane to bacteria in vitro: A scanning electron microscopic and histological study. Simion M, et al. 753

METAPLASIA
Oral sebaceous retention phenomenon. Koutlas IG, et al. 186

METRONIDAZOLE/therapeutic use
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Clinical findings. Sander L, et al. 914
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Microbiological findings. Frandsen EVG, et al. 921

MICROBIOLOGY
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30

MICROSCOPY, ELECTRON
Osteoblast activity at the dental implant-bone interface: Transmission electron microscopic and high voltage electron microscopic observations. Steflik DE, et al. 404

MINOCYCLINE/therapeutic use
Clinical and microbiological effects of controlled-release locally delivered minocycline in periodontitis. Jones AA, et al. 1058
The effect of root conditioning with minocycline HCl in removing endotoxin from the roots of periodontally-involved teeth. Minabe M, et al. 387
Locally delivered minocycline and guided tissue regeneration to treat post-juvenile periodontitis. A case report. Saito A, et al. 835

MODELS, ANIMAL
Animal models in reconstructive periodontal surgery. Page RC. 1142
Comparison of canine and non-human primate animal models for periodontal regenerative therapy: Results following a single administration of PDGF/IGF-I. Giannobile WV, et al. 1158
Discussion: Animal models in reconstructive therapy. Selvig KA. 1169
Non-human primate models for testing the efficacy and safety of periodontal regeneration procedures. Caton J, et al. 1143
Periodontal repair in dogs: Supraalveolar defect models for evaluation of safety and efficacy of periodontal reconstructive therapy. Wikesjö UME, et al. 1151

MODELS, BIOLOGICAL
Methods of assessing risk for periodontitis and developing multifactorial models. Beck JD. 468

MODELS, STATISTICAL
Modeling the relationship between clinical, microbio-

logic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
MONOCYTES
Host responses in patients with generalized refractory periodontitis. Hernichel-Gorbach E, et al. 8
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
Smokeless tobacco effects on monocyte secretion of PGE and IL-1β. Payne JB, et al. 937
MORPHOLINE/therapeutic use
The relative efficacy of 0.1% and 0.2% delmopinol mouthrinses in inhibiting the development of supragingival dental plaque and gingivitis in man. Abbott DM, et al. 437
MOUTHRINSES/therapeutic use
Chlorhexidine use after two decades of over-the-counter availability. Albandar JM, et al. 109
Effectiveness of adjunctive irrigation in early periodontitis: Multi-center evaluation. Newman MG, et al. 224
Efficacy of mouthrinses in inhibiting the development of supragingival plaque over a 4-day period of no oral hygiene. Moran J, et al. 904
The relative efficacy of 0.1% and 0.2% delmopinol mouthrinses in inhibiting the development of supragingival dental plaque and gingivitis in man. Abbott DM, et al. 437
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30
A study of a pre-brushing mouthrinse as an adjunct to oral hygiene. Hunter L, et al. 762
A 12-month study of the efficacy of a pre-brushing rinse in plaque removal. O'Mullane DM, et al. 611
MULTIPLE SCLEROSIS
Gingival overgrowth in cyclosporine-A treated multiple sclerosis patients. Hefti, AF, et al. 744
MUNCHAUSEN SYNDROME
Factitious gingival ulceration: A presenting sign of Munchausen's syndrome? Heasman PA, et al. 442

N

NEUTROPHILS
Cytokine-dependent synergistic regulation of interleukin-8 production from human gingival fibroblasts. Takigawa M, et al. 1002
Molecular basis of leukocyte adhesion molecules in early-onset periodontitis patients with decreased CD11/CD18 expression on leukocytes. Katsuragi K, et al.949
Neutrophil defects as risk factors for periodontal diseases. Hart TC, et al. 521
Priming effect of *Porphyromonas gingivalis* lipopolysaccharide on superoxide production by neutrophils from healthy and rapidly progressive periodontitis subjects. Shapira L, et al. 129
NIFEDIPINE/adverse effects
Comparative metabolism of 3H-glucosamine by fibroblast populations exposed to cyclosporine. Zebrowski EJ, et al. 565
NUCLEAR MAGNETIC RESONANCE
T e effect of a light-cured periodontal dressing material on HeLa cells and fibroblasts in vitro. Gilbert AD, et al. 324

O

OCCUPATIONAL DISEASES
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260
OLIGONUCLEOTIDE PROBE
Direct detection of *Porphyromonas gingivalis* in *Macaca fascicularis* dental plaque samples using an oligonucleotide probe. Moncla BJ, et al. 398
ORAL HEALTH SURVEYS
Utilization of dental services as a risk factor for periodontitis. Brown LJ, et al. 551
ORAL HYGIENE
Chlorhexidine use after two decades of over-the-counter availability. Albandar JM, et al. 109
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
The influencee of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman, KS, et al. 848
Long-term effect of two preventive programs on the incidence of plaque and gingivitis in adolescents. Albandar JM, et al. 605
Oral hygiene and compliance as risk factors in periodontitis. Bakdash B. 539
Periodontal therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 268
ORAL HYGIENE/adverse effects
Gingival recession: Intra-oral distribution and associated factors. Joshipura KJ, et al. 864
ORAL HYGIENE/methods
Effectiveness of adjunctive irrigation in early periodontitis: Multi-center evaluation. Newman MG, et al. 224
ORTHODONTICS, CORRECTIVE/adverse effects
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
ORTHODONTICS, INTERCEPTIVE/adverse effects
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
ORTHODONTICS, PREVENTIVE/adverse effects
Incidence of early periodontitis in a group of young individuals during 8 years: Associations with selected potential predictors. Aass AA, et al. 814
OSSEOINTEGRATION
Bone grafting and guided bone regeneration for immediate dental implants in humans. Gher ME, et al. 881

Evaluation of consecutively placed unloaded root-form and plate-form implants in adult *Macaca mulatta* monkeys. Fritz ME, et al. 788
Evaluation of the effects of diagnostic radiation on titanium dental implant osseointegration in the micropig. Basquill PJ, et al. 872
OSTEOBLASTS
Osteoblast activity at the dental implant-bone interface: Transmission electron microscopic and high voltage electron microscopic observations. Steflik DE, et al. 404
OSTEOPOROSIS
Osteoporosis: A risk factor in periodontal disease. von Wowern N, et al. 1134
OSTEOSARCOMA
Osteosarcoma presenting as supracrestal bone formation. Kabani SP, et al. 92

P

PAIN/prevention and control
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
PAPILLON-LEFÉVRE SYNDROME
Clinical, bacteriological, and immunological examinations and the treatment process of two Papillon-Lefévre syndrome patients. Ishikawa I, et al. 364
PATIENT ACCEPTANCE OF HEALTH CARE
Association of clinical risk factors with treatment outcomes. Newman MG, et al. 489
Utilization of dental services as a risk factor for periodontitis. Brown LJ, et al. 551
PATIENT CARE PLANNING
Root grooves: A risk factor in periodontal attachment loss. Leknes KN, et al. 859
PATIENT COMPLIANCE
Oral hygiene and compliance as risk factors in periodontitis. Bakdash B. 539
PERIODONTAL ABSCESS
Effect of treatment on some periodontopathogens and their antibody levels in periodontal abscesses. Hafstrom CA, et al. 1022
PERIODONTAL ATTACHMENT
Cigarette smoking and periodontal destruction in young adults. Linden GJ, et al. 718
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
A clinical study of an electronic constant force periodontal probe. Tupta-Veselicky L, et al. 616
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46
Differential effect of TGF-β1 and PDGF on proliferation of periodontal ligament cells and gingival fibroblasts. Dennison DK, et al. 641
The effect of post-surgical flap placement on probing depth and attachment level: A 2-year longitudinal study. Machtei EE, et al. 855
The influence of molar furcation involvement and mobility on future clinical periodontal attachment loss. Wang H-L, et al. 25
Root grooves: A risk factor in periodontal attachment loss. Leknes KN, et al. 859
Synthetic bioresorbable barrier for regeneration in human periodontal defects. Caton J, et al. 1037
PERIODONTAL DISEASES
Periodontal disease as we approach the year 2000. Löe H. 464
PERIODONTAL DISEASES/complications
Osteoporosis: A risk factor in periodontal disease. von Wowern N, et al. 1134
PERIODONTAL DISEASES/diagnosis
Comparison of a conventional probe with electronic and manual pressure-regulated probes. Perry DA, et al. 908
The diagnosis of periodontal conditions associated with HIV infection. Robinson PG, et al. 236
Periodontal disease in non-insulin dependent diabetes mellitus (NIDDM). The effect of age and time since diagnosis. Cerda-G J, et al. 991
Probing velocity: Novel approach for assessment of inflamed periodontal attachment. Tessier J-F, et al. 103
Root grooves: A risk factor in periodontal attachment loss. Leknes KN, et al. 859
Use of furcal bone sounding to improve accuracy of furcation diagnosis. Mealey BL, et al. 649
PERIODONTAL DISEASES/epidemiology
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260
Tobacco use as a risk factor. Bergstrom J, et al. 545
Periodontal disease among New England elders. Fox CH, et al. 676
PERIODONTAL DISEASES/etiology
Association of the severity of periodontal disease with organ complications in Type I diabetic patients. Karjalainen KM, et al. 1067
Cigarette smoking and periodontal destruction in young adults. Linden GJ, et al. 718
Non-human primate models for testing the efficacy and safety of periodontal regeneration procedures. Caton J, et al. 1143
Prostaglandin E_2 inhibits interleukin-6 release but not its transcription in human gingival fibroblasts stimulated with interleukin-1β or tumor necrosis factor-α. Takigawa M, et al. 1122
The relationship between first presentation and subsequent observations in heavy calculus formers. Blank LW, et al. 750
Tobacco use as a risk factor. Bergstrom J, et al. 545
PERIODONTAL DISEASES/immunology
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
PERIODONTAL DISEASES/microbiology
Actinobacillus actinmomycetemcomitans in adult periodontitis. II. Characterization of isolated strains and effect of mechanical periodontal treatment. Mombelli A, et al. 827
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260

Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
Development of a risk profile for periodontal disease: Microbial and host response factors. Lamster IB, et al. 511
The distribution and transmission of *Actinobacillus actinomycetemcomitans* in families with established adult periodontitis. Preus HR, et al. 2
Effects of tetracycline-containing gel and a mixture of tetracycline and citric acid-containing gel on non-surgical periodontal therapy. Jeong S-N, et al. 840
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
PERIODONTAL DISEASES/pathogenesis
Assessment of interleukin-6 in the pathogenesis of periodontal disease. Takahashi K, et al. 147
Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
Effect of treatment on some periodontopathogens and their antibody levels in periodontal abscesses. Hafström CA, et al. 1022
Relationship of oral malodor to periodontitis: Evidence of independence in discrete subpopulations. Bosy A, et al. 37
PERIODONTAL DISEASES/surgery
Clinical evaluation of coralline calcium carbonate as a bone replacement graft material in human periodontal osseous defects. Yukna RA. 177
Comparison of canine and non-human primate animal models for periodontal regenerative therapy: Results following a single administration of PDGF/IGF-I. Giannobile WV, et al. 1158
The connective tissue with partial thickness double pedicle graft: The results of 100 consecutively-treated defects. Harris RJ. 448
Discussion: Animal models in reconstructive therapy. Selvig KA. 1169
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Clinical findings. Sander L, et al. 914
The effect of post-surgical flap placement on probing depth and attachment level: A 2-year longitudinal study. Machtei EE, et al. 855
Guided tissue regeneration: Comparison of bioabsorbable and non-bioabsorbable membranes. Histologic and histometric study in dogs. Caffesse RG, et al. 583
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
Non-human primate models for testing the efficacy and safety of periodontal regeneration procedures. Caton J, et al. 1143
Periodontal repair in dogs: Supraalveolar defect models for evaluation of safety and efficacy of periodontal reconstructive therapy. Wikesjö UME, et al. 1151
PERIODONTAL DISEASES/therapy
Actinobacillus actinomomycetemcomitans in adult periodontitis. II. Characterization of isolated strains and effect of mechanical periodontal treatment. Mombelli A, et al. 827
Animal models in reconstructive periodontal therapy. Page RC. 1142
Chlorhexidine use after two decades of over-the-counter availability. Albandar JM, et al. 109
Comparison of canine and non-human primate animal models for periodontal regenerative therapy: results following a single administration of PDGF/IGF-I. Giannobile WV, et al. 1158
The connective tissue with partial thickness double pedicle graft: The results of 100 consecutively-treated defects. Harris RJ. 448
Discussion: Animal models in reconstructive therapy. Selvig KA. 1169
Effect of treatment on some periodontopathogens and their antibody levels in periodontal abscesses. Hafström CA, et al. 1022
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134
Periodontal repair in dogs: Supraalveolar defect models for evaluation of safety and efficacy of periodontal reconstructive therapy. Wikesjö UME, et al. 1151
PERIODONTAL DISEASES/transmission
The distribution and transmission of *Actinobacillus actinomycetemcomitans* in families with established adult periodontitis. Preus HR, et al. 2
PERIODONTAL DRESSINGS
The effect of a light-cured periodontal dressing material on HeLa cells and fibroblasts in vitro. Gilbert AD, et al. 324
PERIODONTAL INDEX
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
PERIODONTAL LIGAMENT
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
Differential effect of TGF-β1 and PDGF on proliferation of periodontal ligament cells and gingival fibroblasts. Dennison DK, et al. 641
PERIODONTAL LIGAMENT/anatomy and histology
The vasculature of the periodontal ligament: A scanning electron microscopic study using corrosion casts in the rat. Selliseth NJ, et al. 1079
PERIODONTAL POCKETS
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Incidence of attachment loss in commmunity-dwelling older adults. Brown, LF, et al. 316
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68

PERIODONTAL POCKETS/diagnosis
A clinical study of an electronic constant force periodontal probe. Tupta-Veselicky L, et al. 616
Microbiota of rapidly progressive periodontitis lesions in association with clinical parameters. Kamma JJ, et al. 1073
PERIODONTAL POCKETS/epidemiology
Attachment loss trends over 3 years in community-dwelling older adults. Beck JD, et al. 737
Incidence of attachment loss in commmunity-dwelling older adults. Brown LF, et al. 316
PERIODONTAL POCKETS/etiology
Incidence of attachment loss in commmunity-dwelling older adults. Brown LF, et al. 316
PERIODONTAL POCKETS/microbiology
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568
Incidence of attachment loss in commmunity-dwelling older adults. Brown LF, et al. 316
Influence of tooth instrumentation roughness on subgingival microbial colonization. Leknes, KN, et al. 303
Microbiota of rapidly progressive periodontitis lesions in association with clinical parameters. Kamma JJ, et al. 1073
PERIODONTAL POCKETS/surgery
The effect of post-surgical flap placement on probing depth and attachment level: A 2-year longitudinal study. Machtei EE, et al. 855
PERIODONTITIS
Host responses in patients with generalized refractory periodontitis. Hernichel-Gorbach E, et al. 8
People at risk for periodontitis: Introduction and dedication. Pihlstrom, BL. 463
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
Superficial cemental curettage: Its efficacy in promoting improved cellular attachment on human root surfaces previously damaged by periodontitis. Fukazawa E, et al. 168
Unique intronic variations of HLA-DQβ gene in early-onset periodontitis. Takashiba S, et al. 379
PERIODONTITIS/diagnosis
Interleukin-1β concentration of gingical crevicular fluid. Preiss D, et al. 423
Longitudinal evaluation of elastase as a marker for the progression of periodontitis. Armitage GC, et al. 120
PERIODONTITIS/drug therapy
Clinical and micrbiological effects of controlled-release locally delivered minocycline in periodontitis. Jones AA, et al. 1058
The influence of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman, KS, et al. 848
PERIODONTITIS/etiology
Bacteria as risk markers for periodontitis. Wolff L, et al. 498
Diabetes - a risk factor for periodontitis in adults? Oliver RC, et al. 530
Neutrophil defects as risk factors for periodontal diseases. Hart TC, et al. 521
PERIODONTITIS/immunology
Elastase and α-1-proteinase inhibitor in gingival crevicular fluid and gingival tissue in adult and juvenile periodontitis. Ingman T, et al. 702
PERIODONTITIS/microbiology
Actinobacillus actinomycetemcomitans in adult periodontitis. 892
Actinobacillus actinomycetemcomitans in adult periodontitis. I. Topographic distribution before and after treatment. Mombelli A, et al. 820
Bacteria as risk markers for periodontitis. Wolff L, et al. 498
Comparative detection frequency of 6 putative periodontal pathogens in Sudanese and Norwegian adult periodontitis patients. Ali RW, et al. 1046
Comparison of DNA probe and ELISA microbial analysis methods and their association with adult periodontitis. Melvon WL, et al. 576
Development of a risk profile for periodontal disease: Microbial and host response factors. Lamster IB, et al. 511
The influence of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman KS, et al. 848
Microbial associations of 4 putative periodontal pathogens in Sudanese adult periodontitis patients determined by DNA probe analysis. Ali RW, et al. 1053
Neutrophil defects as risk factors for periodontal diseases. Hart TC, et al. 521
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30
PERIODONTITIS/pathogenesis
Comparative detection frequency of 6 putative periodontal pathogens in Sudanese and Norwegian adult periodontitis patients. Ali RW, et al. 1046
Microbial associations of 4 putative periodontal pathogens in Sudanese adult periodontitis patients determined by DNA probe analysis. Ali RW, et al. 1053
PERIODONTITIS/prevention and control
Actinobacillus actinomycetemcomitans in adult periodontitis. I. Topographic distribution before and after treatment. Mombelli A, et al. 820
Alterations of fibroblast metabolism in early ligature-induced periodontitis in the Cynomolgus monkey. Hussain MZ, et al. 771
Genetic and heritable risk factors in periodontal disease. Michalowicz BS. 479
Methods of assessing risk for periodontitis and developing multifactorial models. Beck JD. 468
Oral hygiene and compliance as risk factors in periodontitis. Bakdash B. 539
Short-term microbiological and clinical effects of subgingival irrigation with an antimicrobial mouthrinse. Fine JB, et al. 30
PERIODONTITIS/therapy
Effectiveness of adjunctive irrigation in early periodontitis: Multi-center evaluation. Newman MG, et al. 224

A 6-month multi-center evaluation of adjunctive tetracycline fiber therapy used in conjunction with scaling and root planing in maintenance patients: Clinical results. Newman MG, et al. 685

PERIODONTITIS, EARLY-ONSET
Molecular basis of leukocyte adhesion molecules in early-onset periodontitis patients with decreased CD11/CD18 expression on leukocytes. Katsuragi K, et al. 949

PERIODONTITIS, EARLY-ONSET/etiology
Evidence for autosomal dominant inheritance and race-specific heterogeneity in early-onset periodontitis. Marazita ML, et al. 623
Gingival cell IL-2 and IL-4 in early-onset periodontitis. Manhart SS, et al. 807
Sequential manifestation of different forms of early-onset periodontitis. A case report. Shapira L, et al. 631

PERIODONTITIS, EARLY-ONSET/physiopathology
HLA A9 and B15 are associated with the generalized form, but not the localized form, of early-onset periodontal diseases. Shapira L, et al. 219
Unique intronic variations of HLA-DQ gene in early-onset periodontitis. Takashiba S, et al. 379

PERIODONTITIS, EARLY-ONSET/prevention and control
Maintenance therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 274
Periodontal therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 268

PERIODONTITIS, EARLY-ONSET/therapy
Periodontal therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 268

PERIODONTITIS, JUVENILE
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139

PERIODONTITIS, JUVENILE/drug therapy
Locally delivered minocycline and guided tissue regeneration to treat post-juvenile periodontitis. A case report. Saito A, et al. 835

PERIODONTITIS, JUVENILE/epidemiology
The prevalence of localized juvenile periodontitis in Saudi subjects. Nassar MM, et al. 698

PERIODONTITIS, JUVENILE/etiology
Evidence for autosomal dominant inheritance and race-specific heterogeneity in early-onset periodontitis. Marazita ML, et al. 623
Sequential manifestation of different forms of early-onset periodontitis. A case report. Shapira L, et al. 631

PERIODONTITIS, JUVENILE/immunology
Elastase and α-1-proteinase inhibitor in gingival crevicular fluid and gingival tissue in adult and juvenile periodontitis. Ingman T, et al. 702

PERIODONTITIS, NECROTIZING ULCERATIVE/epidemiology
Necrotizing ulcerative periodontitis: A marker for immune deterioration and a predictor for the diagnosis of AIDS. Glick M, et al. 393

PERIODONTITIS, NECROTIZING ULCERATIVE/pathogenesis
Impaired bactericidal activity of PMN from two brothers with necrotizing ulcerative gingivo-periodontitis. Cutler CW, et al. 357

PERIODONTITIS, PRE-PUBERTAL/etiology
Sequential manifestation of different forms of early-onset periodontitis. A case report. Shapira L, et al. 631

PERIODONTITIS, RAPIDLY PROGRESSIVE
Priming effect of *Porphyromonas gingivalis* lipopolysaccharide on superoxide production by neutrophils from healthy and rapidly progressive periodontitis subjects. Shapira L, et al. 129

PERIODONTITIS, RAPIDLY PROGRESSIVE/diagnosis
Microbiota of rapidly progressive periodontitis lesions in association with clinical parameters. Kamma JJ, et al. 1073

PERIODONTITIS, RAPIDLY PROGRESSIVE/etiology
Sequential manifestation of different forms of early-onset periodontitis. A case report. Shapira L, et al. 631

PERIODONTITIS, RAPIDLY PROGRESSIVE/microbiology
Microbiota of rapidly progressive periodontitis lesions in association with clinical parameters. Kamma JJ, et al. 1073

PERIODONTIUM/anatomy and histology
Response of regenerative tissues to plaque: A histological study in monkeys. Ling L-J, et al. 779

PERIODONTIUM/physiology
The effect of platelet-derived growth factor on the cellular response of the periodontium: An autoradiographic study on dogs. Wang H-L, et al. 429

PLANING
Clinical and microbiological effects of controlled-release locally delivered minocycline in periodontitis. Jones AA, et al. 1058
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568
Effects of tetracycline-containing gel and a mixture of tetracycline and citric acid-containing gel on non-surgical periodontal therapy. Jeong S-N, et al. 840
The influence of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman KS, et al. 848
Periodontal therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 268

PLANING/instrumentation
Influence of tooth instrumentation roughness on subgingival microbial colonization. Leknes KN, et al. 303

PLANING/methods
A 6-month multi-center evaluation of adjunctive tetracycline fiber therapy used in conjunction with scaling and root planing in maintenance patients: Clinical results. Newman MG, et al. 685

POLYGLACTIN/microbiology
Adherence of oral microorganisms to guided tissue membranes: An in vitro study. Wang H-L, et al. 211

POLYLACTIC ACID
Periodontal guided tissue regeneration with a new resorbable polylactic acid membrane. Robert PM, et al. 414

POLYTETRAFLUOROETHYLENE/microbiology
Adherence of oral microorganisms to guided tissue membranes: An in vitro study. Wang H-L, et al. 211

POLYTETRAFLUOROETHYLENE/therapeutic use
Clinical, microbiological, and histological factors which influence the success of regenerative periodontal therapy. Machtei EE, et al. 154
Comparative study of collagen and expanded polytetrafluoroethylene membranes in the treatment of human Class II furcation defects. Black BS, et al. 598
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Clinical findings. Sander L, et al. 914
Effect of local metronidazole application on periodontal healing following guided tissue regeneration. Microbiological findings. Frandsen EVG, et al. 921
The effect of platelet-derived growth factor on the cellular response of the periodontium: An autoradiographic study on dogs. Wang H-L, et al. 429
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
Guided tissue regeneration with and without decalcified freeze-dried bone in mandibular Class II furcation invasions. Wallace SC, et al. 244
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134
The influence of surface-free energy on supra- and subgingival plaque microbiology. An in vitro study on implants. Quirynen M, et al. 162
Periodontal repair in dogs: Space provision by reinforced ePTFE membranes enhances bone and cementum regeneration in large supraalveolar defects. Sigurdsson TJ, et al. 350
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592
PORPHYROMONAS GINGIVALIS
Clinical and microbiological status of osseointegrated implants. George K, et al. 766
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46
Direct detection of *Porphyromonas gingivalis* in *Macaca fascicularis* dental plaque samples using an oligonucleotide probe. Moncla BJ, et al. 398
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568
Flow-cytometric identification and detection of *Porphyromonas gingivalis* by a LPS specific monoclonal antibody. Kamiya I, et al. 309
Gingival cell IL-2 and IL-4 in early-onset periodontitis. Manhart SS, et al. 807
The influence of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman KS, et al. 848
Priming effect of *Porphyromonas gingivalis* lipopolysaccharide on superoxide production by neutrophils from healthy and rapidly progressive periodontitis subjects. Shapira L, et al. 129
PREVOTELLA INTERMEDIA
Clinical and microbiological status of osseointegrated implants. George K, et al. 766
Detection of *Porphyromonas gingivalis* in gingival exudate by a dipeptide-enhanced trypsin-like activity. Wikström M, et al. 46
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568
Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
PREVOTELLA NIGRESCENS
Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
PROGNOSIS
Alterations of fibroblast metabolism in early ligature-induced periodontitis in the Cynomolgus monkey. Hussain MZ, et al. 771
Association of clinical risk factors with treatment outcomes. Newman MG, et al. 489
PROSTAGLANDIN E
Host responses in patients with generalized refractory periodontitis. Hernichel-Gorbach E, et al. 8
Prostaglandin E_2 inhibits interleukin-6 release but not its transcription in human gingival fibroblasts stimulated with interleukin-1 or tumor necrosis factor-α. Takigawa M, et al. 1122
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
Smokeless tobacco effects on monocyte secretion of PGE and IL-1β. Payne JB, et al. 937
PROTEINASE INHIBITORS
Elastase and α-1-proteinase inhibitor in gingival crevicular fluid and gingival tissue in adult and juvenile periodontitis. Ingman T, et al. 702

R

RACE FACTORS
Attachment loss trends over 3 years in community-dwelling older adults. Beck JD, et al. 737
Comparative detection frequency of 6 putative periodontal pathogens in Sudanese and Norwegian adult periodontitis patients. Ali RW, et al. 1046
The relationship between first presentation and subsequent observations in heavy calculus formers. Blank LW, et al. 750
RACIAL STOCKS
HLA A9 and B15 are associated with the generalized form, but not the localized form, of early-onset periodontal diseases. Shapira L, et al. 219
RADIATION EFFECTS
Evaluation of the effects of diagnostic radiation on tita-

nium dental implant osseointegration in the micropig. Basquill PJ, et al. 872
RADIATION INJURIES
Evaluation of the effects of diagnostic radiation on titanium dental implant osseointegration in the micropig. Basquill PJ, et al. 872
RADIOGRAPHY, DENTAL/instrumentation
Evaluation of a simple modified radiographic alignment system for routine use. Carpio LC, et al. 62
RADIONUCLIDE IMAGING
Technetium 99m-MDP scintigraphy of patients undergoing implant prosthetic procedures: A follow-up study. Meidan Z, et al. 330
RECEPTOR AGGREGATION
Molecular basis of leukocyte adhesion molecules in early-onset periodontitis patients with decreased CD11/CD18 expression on leukocytes. Katsuragi K, et al. 949
RECEPTORS, ESTROGEN
Identification and semi-quantification of estrogen and progesterone receptors in peripheral giant cell lesions of the jaws. Whitaker SB, et al. 280
RECEPTORS, LYMPHOCYTE
Role of cytokine in the induction of adhesion molecules on cultured human gingival fibroblasts. Takahashi K, et al. 230
RECEPTORS, PROGESTERONE
Identification and semi-quantification of estrogen and progesterone receptors in peripheral giant cell lesions of the jaws. Whitaker SB, et al. 280
RISK FACTORS
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260
Association of clinical risk factors with treatment outcomes. Newman MG, et al. 489
Bacteria as risk markers for periodontitis. Wolff L, et al. 498
Development of a risk profile for periodontal disease: Microbial and host response factors. Lamster IB, et al. 511
Diabetes - a risk factor for periodontitis in adults? Oliver RC, et al. 530
Genetic and heritable risk factors in periodontal disease. Michalowicz BS. 479
Gingival recession: Intra-oral distribution and associated factors. Joshipura KJ, et al. 864
Longitudinal evaluation of elastase as a marker for the progression of periodontitis. Armitage GC, et al. 120
Methods of assessing risk for periodontitis and developing multifactorial models. Beck JD. 468
Neutrophil defects as risk factors for periodontal diseases. Hart TC, et al. 521
Osteoporosis: A risk factor in periodontal disease. von Wowern N, et al. 1134
People at risk for periodontitis: Introduction and dedication. Pihlstrom BL. 463
Smoking as an additional risk for tooth loss. Holm G. 996
Subgingival temperature in rats with natural gingivitis. Isogai E, et al. 710
Tobacco use as a risk factor. Bergström J, et al. 545
Utilization of dental services as a risk factor for periodontitis. Brown LJ, et al. 551
RISK-TAKING
Methods of assessing risk for periodontitis and developing multifactorial models. Beck JD. 468
RNA
Topological differences in the expression of collagen Type I and collagen Type III mRNAs in the rat gingiva. Redlich M, et al. 776

S

SALIVA/analysis
Gingival overgrowth in cyclosporine A treated multiple sclerosis patients. Hefti AF, et al. 744
SCALING
Clinical and microbiological effects of controlled-release locally delivered minocycline in periodontitis. Jones AA, et al. 1058
DNA probe analyses of the survival of selected periodontal pathogens following scaling, root planing, and intra-pocket irrigation. Shiloah J, et al. 568
The influence of supragingival plaque control on clinical and microbial outcomes following the use of antibiotics for the treatment of periodontitis. Kornman KS, et al. 848
Periodontal therapy in young adults with severe generalized periodontitis. Gunsolley JC, et al. 268
The relationship between first presentation and subsequent observations in heavy calculus formers. Blank LW, et al. 750
SCALING/instrumentation
Influence of tooth instrumentation roughness on subgingival microbial colonization. Leknes KN, et al. 303
SCALING/methods
In vitro studies on laser scaling of subgingival calculus with an erbium:YAG laser. Aoki A, et al. 1097
A 6-month multi-center evaluation of adjunctive tetracycline fiber therapy used in conjunction with scaling and root planing in maintenance patients: Clinical results. Newman MG, et al. 685
SEBACEOUS GLANDS/abnormalities
Oral sebaceous retention phenomenon. Koutlas IG, et al. 186
SEROTYPES
Actinobacillus actinomomycetemcomitans in adult periodontitis. II. Characterization of isolated strains and effect of mechanical periodontal treatment. Mombelli A, et al. 827
SERUM/analysis
Effect of treatment on some periodontopathogens and their antibody levels in periodontal abscesses. Hafstrom CA, et al. 1022
SEX FACTORS
The prevalence of localized juvenile periodontitis in Saudi subjects. Nassar MM, et al. 698
The relationship between first presentation and subse-

quent observations in heavy calculus formers. Blank LW, et al. 750
SMOKING/adverse effects
Smoking as an additional risk for tooth loss. Holm G. 996
SPACE MAINTENANCE
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
STOMATITIS
Factitious gingival ulceration: A presenting sign of Munchausen's syndrome? Heasman PA, et al. 442
STRONTIUM
Dentine hypersensitivity: A clinical trial to compare 2 strontium desensitizing toothpastes with a conventional fluoride toothpaste. Pearce NX, et al. 113
SUBSTANCE P
Substance P: An immunohistochemical and biochemical study in human gingival tissues. A role for neurogenic inflammation? Bartold PM, et al. 1113
SULFUR COMPOUNDS
Relationship of oral malodor to periodontitis: Evidence of independence in discrete subpopulations. Bosy A, et al. 37
SUPEROXIDES
Priming effect of *Porphyromonas gingivalis* lipopolysaccharide on superoxide production by neutrophils from healthy and rapidly progressive periodontitis subjects. Shapira L, et al. 129
SUPRACRESTAL BONE
Osteosarcoma presenting as supracrestal bone formation. Kabani SP, et al. 92
SURFACE PROPERTIES
Characterization of *Prevotella intermedia* and *Prevotella nigrescens* isolates from periodontic and endodontic infections. Gharbia SE, et al. 56
The influence of surface-free energy on supra- and subgingival plaque microbiology. An in vitro study on implants. Quirynen M, et al. 162
SURGICAL FLAPS
Clinical evaluation of coralline calcium carbonate as a bone replacement graft material in human periodontal osseous defects. Yukna RA. 177
The connective tissue with partial thickness double pedicle graft: The results of 100 consecutively-treated defects. Harris RJ. 448
The effect of post-surgical flap placement on probing depth and attachment level: a 2-year longitudinal study. Machtei EE, et al. 855
A histomorphometric study on the healing of Class III furcations utilizing bone labeling in beagle dogs. White C Jr, et al. 84
Periodontal repair in dogs: Space provision by reinforced ePTFE membranes enhances bone and cementum regeneration in large supraalveolar defects. Sigurdsson, TJ, et al. 350
Regional accelerated phenomenon in the mandible following mucoperiosteal flap surgery. Yaffe A, et al. 78
Subepithelial connective tissue grafts in the treatment of gingival recessions. A comparative study of 2 procedures. Bouchard P, et al. 929
Treatment of mandibular Class III periodontal furcation defects. Coronally positioned flaps with and without expanded polytetrafluoroethylene membranes. Garrett S, et al. 592
SYNERGISM
Cytokine-dependent synergistic regulation of Interleukin-8 production from human gingival fibroblasts. Takigawa M, et al. 1002
SYSTEMIC DISEASES/complications
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260

T

TEMPERATURE
Subgingival temperature in rats with natural gingivitis. Isogai E, et al. 710
TETRACYCLINE/therapeutic use
Combined guided tissue regeneration, root conditioning, and fibrin-fibronectin system application in the treatment of gingival recession. A 15-case report. Trombelli L, et al. 796
Effects of tetracycline-containing gel and a mixture of tetracycline and citric acid-containing gel on non-surgical periodontal therapy. Jeong S-N, et al. 840
A 6-month multi-center evaluation of adjunctive tetracycline fiber therapy used in conjunction with scaling and root planing in maintenance patients: Clinical results. Newman MG, et al. 685
TISSUE CULTURE
The effect of a light-cured periodontal dressing material on HeLa cells and fibroblasts in vitro. Gilbert AD, et al. 324
TISSUE EXPANSION
Expanded polytetrafluoroethylene titanium-reinforced membranes for regeneration of mucogingival recession defects. A 12-case report. Tinti C, et al. 1088
TITANIUM
Bone grafting and guided bone regeneration for immediate dental implants in humans. Gher ME, et al. 881
Contaminated implant surfaces: An in vitro comparison of implant surface coating and treatment modalities for decontamination. Dennison DK, et al. 942
Freeze-dried dura mater for guided tissue regeneration in post-extraction dental implants: A clinical and histologic study. Fontana E, et al. 658
The influence of surface-free energy on supra- and subgingival plaque microbiology. An in vitro study on implants. Quirynen M, et al. 162
TOBACCO/adverse effects
Assessment of risk for periodontal disease. I. Risk indicators for attachment loss. Grossi SG, et al. 260
Cigarette smoking and periodontal destruction in young adults. Linden GJ, et al. 718
Incidence of attachment loss in commmunity-dwelling older adults. Brown LF, et al. 316
Smoking as an additional risk for tooth loss. Holm G. 996
Tobacco use as a risk factor. Bergström J, et al. 545

TOBACCO, SMOKELESS
Smokeless tobacco effects on monocyte secretion of PGE_2 and IL-1β. Payne JB, et al. 937
TONGUE DISEASES/pathogenesis
Relationship of oral malodor to periodontitis: Evidence of independence in discrete subpopulations. Bosy A, et al. 37
TOOTH/anatomy and histology
In vitro studies on laser scaling of subgingival calculus with an erbium:YAG laser. Aoki A, et al. 1097
Root grooves: A risk factor in periodontal attachment loss. Leknes KN, et al. 859
TOOTH ABRASION
Gingival recession: Intra-oral distribution and associated factors. Joshipura KJ, et al. 864
TOOTH LOSS/epidemiology
Smoking as an additional risk for tooth loss. Holm G. 996
TOOTH LOSS/etiology
The influence of molar furcation involvement and mobility on future clinical periodontal attachment loss. Wang H-L, et al. 25
TOOTH MOBILITY
Modeling the relationship between clinical, microbiologic, and immunologic parameters and alveolar bone levels in an elderly population. Wheeler TT, et al. 68
TOOTH MOBILITY/etiology
The influence of molar furcation involvement and mobility on future clinical periodontal attachment loss. Wang H-L, et al. 25
TOOTH ROOT
Combined guided tissue regeneration, root conditioning, and fibrin-fibronectin system application in the treatment of gingival recession. A 15-case report. Trombelli L, et al. 796
The connective tissue with partial thickness double pedicle graft: The results of 100 consecutively-treated defects. Harris RJ. 448
The effect of root conditioning with minocycline HCl in removing endotoxin from the roots of periodontally-involved teeth. Minabe M, et al. 387
Effects of tetracycline-containing gel and a mixture of tetracycline and citric acid-containing gel on non-surgical periodontal therapy. Jeong S-N, et al. 840
Subepithelial connective tissue grafts in the treatment of gingival recessions. A comparative study of 2 procedures. Bouchard P, et al. 929
Superficial cemental curettage: Its efficacy in promoting improved cellular attachment on human root surfaces previously damaged by periodontitis. Fukazawa E, et al. 168
TOOTH ROOT//anatomy and histology
Root grooves: A risk factor in periodontal attachment loss. Leknes KN, et al. 859
TOOTH ROOT/microbiology
Influence of tooth instrumentation roughness on subgingival microbial colonization. Leknes KN, et al. 303
TOOTHBRUSHING/adverse effects
Gingival recession: Intra-oral distribution and associated factors. Joshipura KJ, et al. 864
A mistaken health belief resulting in gingival injury: A case report. Pearlman BA. 284
TOOTHBRUSHING/instrumentation
Clinical evaluation of the efficacy and safety of a new sonic toothbrush. Johnson BD, et al. 692
TOOTHBRUSHING/methods
Clinical evaluation of the efficacy and safety of a new sonic toothbrush. Johnson BD, et al. 692
Dentin hypersensitivity. Occlusion of dentinal tubules by brushing with and without an abrasive dentifrice. Kuroiwa M, et al. 291
TRANSCRIPTION FACTORS
Assessment of interleukin-6 in the pathogenesis of periodontal disease. Takahashi K, et al. 147
TREATMENT OUTCOME
Association of clinical risk factors with treatment outcomes. Newman MG, et al. 489
TRICLOSAN/therapeutic use
A study of a pre-brushing mouthrinse as an adjunct to oral hygiene. Hunter L, et al. 762
TUMOR NECROSIS FACTOR
Prostaglandin E_2 inhibits interleukin-6 release but not its transcription in human gingival fibroblasts stimulated with interleukin-1β or tumor necrosis factor-α. Takigawa M, et al. 1122
The secretion of PGE_2, IL-1β, Il-6, and TNFα by adherent mononuclear cells from early onset periodontitis patients. Shapira L, et al. 139
TWINS
Genetic and heritable risk factors in periodontal disease. Michalowicz BS. 479

U

UTILIZATION REVIEW
Utilization of dental services as a risk factor for periodontitis. Brown LJ, et al. 551

V

VIMENTIN
Immunohistochemical analysis of tissues regenerated from within periodontal defects treated with expanded polytetrafluoroethylene membranes. Pritlove-Carson S, et al. 134

W

WOUND HEALING
Comparison of canine and non-human primate animal models for periodontal regenerative therapy: Results following a single administration of PDGF/IGF-I. Giannobile WV, et al. 1158
A comparison of the effect of epidermal growth factor, platelet-derived growth factor, and fibroblast growth factor on rat periodontal ligament fibroblast-like cells' DNA synthesis and morphology. Blom S, et al. 373
